

- h) Where multi message signs are used and a sign is required at the same location for both directions of travel, the following options may be applied:
 - i. use two separate multi message sign assemblies, placed back to back to face opposing directions of traffic, or
 - ii. if orientation and sight lines to opposing directions of traffic can be achieved, the one multi message assembly may be used with the panels installed back to back on the one frame.
- i) When used, the Speed Limit AHEAD and the END speed limit panels in MMS arrangements shall be placed in the top position of the frame on the side closest to the traffic.

The requirements in a) and g) do not apply when using the 1200 x 300 multi-message panel (TM5 1B) DETOUR with a small arrow, or (TM5-1Q01) DETOUR with U-Turn symbol and there are no relevant messages that may be added to this assembly. In this case, a single TM5 1B or

TM5-1-Q01 panel may be used as the top panel in a multi message frame with two blanks (see example in Figure 4.2.2(e)).

Further information regarding the multi-message signs and examples are provided in this Section, Appendices A and B, and the Austroads Guide to Temporary Traffic Management.
