SHW Serious Incident (SI) – Final Notice

Date of Incident:	24/08/2022	Time of Incident:	1330
Region / Directorate:	Metro	Main Roads or Contractor:	Contractor
EQSafe Event Type:	Injury / Illness	EQSafe Incident Number:	28113
Actual Consequence:	Moderate	Potential Consequence:	Moderate

Incident Short Description:	Worker exiting truck slipped and fell on traffic cone, resulting in Lost Time Injury (LTI)
------------------------------------	--

Executive Summary:

Following arrival on site at approximately 1.20pm on Wednesday 24th August, Worker has exited the driver's side door of the truck and was making contact with the ground when his foot landed on a traffic cone, causing him to fall forward.

As a result of falling forward, The Injured Person (IP) has landed on the traffic cone, fracturing his left side ribs (ribs 5 and 6).

Incident Photos:

Truck involved in event

Contributing Factors:	
• IP was not aware of footing and did not look to where he was placing his feet on exiting truck. IP had exited truck on site many times before. • No mention of safe egress in Safe Work Method Statement (SWMS). • Limited space from barrier to oncoming traffic. • Wide load trucks hit the traffic cones.	
Corrective Actions:	
• Contractor to review SWMS on mobile plant to include safe egress from mobile plant.	
 Critical Risk: This serious potential incident aligns with the Main Roads Critical Risk Profile relating to 'Fall from Height'.	
Distribution of Notice:	Main Roads Personnel and Contracting Organisations
