SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	31 October 2023	Time of Incident	0915
Directorate / Region	RMO – Wheatbelt	Main Roads or Contractor	Contractor
EQSafe Event Type	Lost Time Injury	EQSafe Incident Number	34854
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Water cart rollover resulting in Lost Time Injury to driver.
-----------------------------------	--

What Happened

On Tuesday 31 October at approximately 9.15am, a water cart has reversed onto an angled embankment and overturned. The water cart was at nearly full water capacity at the time, having just come back from refilling.

After the incident, the driver (Injured Person – IP) was immediately evacuated from the truck via the windscreen.

Upon exiting the water cart, the IP was assessed for injuries and a laceration to the left calf was observed. First Aid was administered to the laceration, however the IP also mentioned that he felt some back pain after the incident.

The IP was transported to Quairading Hospital for assessment and was then referred to the hospital in Northam to receive scans on the kidneys, as it was suspected that there could be damage to the kidneys.

The IP remained in hospital overnight for monitoring and until the results of the scans had been confirmed. Whilst it was confirmed that there was no damage to the kidneys, the IP was instructed by his doctor to remain at home resting until his next appointment between 8 and 15 November, therefore resulting in a Lost Time Injury.

Image of overturned water cart showing evacuation point through the windscreen.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Mobile Plant**.
