SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	31 October 2023	Time of Incident:	15:11
Directorate / Region:	IDD	Main Roads or Contractor:	Subcontractor
EQSafe Event Type:	Near Miss - Procedure Breach	EQSafe Incident Number:	34982
Actual Consequence:	Insignificant	Potential Consequence:	Major

Incident Short Description:	Concrete Pump Truck conducted turn in break of traffic without traffic management
------------------------------------	---

What Happened:

Prior to entering the work site, the driver of a concrete boom pump (truck) and a supervisor conducted a walk through the work location to determine how conduct their task.

The discussion determined that the driver needed to turn the pump around to a north pointing orientation. However, during the manoeuvre the driver mis-judged the turn and needed to reverse for the turn to be completed.

The driver made the decision to conduct the turn in a gap in live traffic, completely blocking a freeway off ramp and partially protruding into the adjacent lane.

Instead of requesting the support of a traffic management team, the driver asked other workers to provide the assistance and they were observed standing in the live lane attempting to warn oncoming traffic of the obstruction putting them into the line of fire.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Interaction with Live Traffic**
