

**RED BANNER ALERT****mainroads**
WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	4 January 2024	Time of Incident	0800
Directorate / Region	RMO (PIL)	Main Roads or Contractor	Main Roads
EQSafe Event Type	Health	EQSafe Incident Number	36715
Actual Consequence	Moderate	Potential Consequence	Major

Incident Short Description	Worker suffers thermal stress, resulting in MTI/LTI
-----------------------------------	---

What Happened

Whilst undertaking litter collection activities, a routine maintenance worker (Injured Person) IP has begun to feel the cumulative effects of forecasted extreme hot weather over the period of 6 working days.

The IP experienced symptoms such as physical shakes, light-headedness, nausea, and diarrhoea. The following day the IP arrived at the Pre-Start Meeting, advised the Supervisor of feeling unwell and went home.

During the day the IP's symptoms worsened and took themselves to hospital for medical assessment. The IP had sustained severe dehydration and remained in hospital for 6 hours receiving medical treatment.

Worksafe have been notified and a formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Thermal Stress
