

**RED BANNER ALERT****mainroads**
WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	26 June 2024	Time of Incident	9:00am
Directorate / Region	RMO – Great Southern Region	Main Roads or Contractor	Contractor
EQSafe Event Type	Procedural Breach	EQSafe Incident Number	41942
Actual Consequence	Minor	Potential Consequence	Major

Incident Short Description	Traffic Controller working excessive hours without sufficient breaks between working shifts.
-----------------------------------	--

What Happened
On 25 June 2024, Main Roads responded to a traffic incident where traffic management was required at the site. A traffic management company arrived on site around 8:15pm the same day to set up and provide traffic control. On 26 June 2024, which was day 2 of the incident, it was identified that a Traffic Controller (TC) had been at the site conducting traffic management working excessive hours (approximately 24) without sufficient breaks between working shifts. There was no traffic control diary written for the shift. The TC was stood down from work activities by the Main Roads supervisor and transport was arranged for the TC to be driven home. The procedural breach was reported to the TC's company and an investigation is underway.
