SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	21/03/24	Time of Incident	5.00pm
Directorate / Region	Heavy Vehicle Services	Main Roads or Contractor	Main Roads
EQSafe Event Type	Injury / Illness	EQSafe Incident Number	39044
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Injury to arm whilst changing tyre, resulting in LTI
-----------------------------------	--

What Happened
At approximately 5.00pm, the Injured Person (IP) has been home garaging a work vehicle and was changing a flat tyre prior to washing and cleaning the vehicle. The IP has removed the damaged wheel and tyre and was fitting a replacement. As he has rotated the wheel and tyre to align the wheel studs, he has felt pain in his right forearm. The IP has then called the after-hours contact number to report the injury and has emailed through an incident report form as per procedure. He has been assessed by his local GP who has certified the IP with no capacity to work for a period of 20 days. The GP has also referred the IP to a specialist for scans. A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
